

EMILE F. JOSEPH

Enterprise Data Governance & Strategy Analyst

612-523-2603 | ejose1921@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Governance and Strategy Analyst with 4+ years of experience across enterprise data governance, security compliance, and program/stakeholder coordination. Experienced developing and maintaining data governance policies, standards, and operating procedures; coordinating governance forums and cross-functional stakeholder engagement; and producing dashboards, briefing materials, and decision-support reporting for executive audiences. Skilled at synthesizing information from multiple sources into clear recommendations, tracking governance metrics and adoption, and maintaining documentation, inventories, and decision records that support transparency, traceability, and audit readiness. Proven ability to manage assigned deliverables and action items independently while partnering effectively across business, technology, risk, and compliance stakeholders.

CORE COMPETENCIES

Enterprise Data Strategy: Governance analysis, planning and execution support, decision-support materials, process improvement, stakeholder coordination

Policy and Standards: Data governance policies, standards, procedures, accountability models, ownership structures, decision rights, operating procedures

Governance Forums and Program Support: Committee/working-group coordination, agenda and material preparation, action tracking, follow-up, charters, decision logs

Reporting and Analytics: Power BI dashboards, governance KPIs, adoption tracking, compliance indicators, trend analysis, executive reporting

Governance Operations: Metadata management, data lineage, business glossaries, data quality, catalog coverage, RBAC, governed data access

Platforms: Atlan, Informatica, Snowflake, Databricks, Power BI, ServiceNow, SQL, Python, Bash

Risk and Compliance: NIST SP 800-53, ISO 27001, SOC 2, HIPAA, GDPR, CCPA, SOX, audit readiness, control monitoring

PROFESSIONAL EXPERIENCE

Enterprise Data Governance Engineer

FedEx Corporation

Apr 2024 – Present

Remote

- Coordinated enterprise data governance activities across Atlan, Informatica, Snowflake, and Databricks, aligning implementation requirements and stakeholder follow-up across data, technology, and business teams.
- Translated governance policies into technical standards, control procedures, and operating guidance with data stewards, architects, and business stakeholders, improving consistency and accountability.
- Analyzed metadata, lineage, classifications, and ownership records from multiple sources, synthesizing findings into governance insights and decision-support materials for leadership.
- Developed Power BI dashboards monitoring governance KPIs — catalog coverage and metadata completeness — providing stakeholders with visibility into adoption and improvement priorities.
- Maintained governance inventories, business glossaries, ownership records, and documentation in centralized repositories to support transparency, traceability, and committee reporting.
- Automated metadata ingestion and data-quality validation through CI/CD workflows, reducing manual governance effort.
- Standardized processes and managed role-based access controls to maintain compliance with GDPR, CCPA, HIPAA, and SOX, reducing audit findings.

Cybersecurity Analyst

FedEx Corporation

Dec 2022 - Apr 2024

Remote

- Serve as a governance resource for cross-functional teams, translating complex compliance and regulatory requirements into clear standards, control procedures, and operating guidance for business and technology stakeholders.
- Collaborated with cross-functional stakeholders to define KPI metrics and governance requirements for a governance SharePoint site tracking team adherence to data standards and quality, maintaining a centralized, traceable governance repository.
- Conduct risk assessments and control evaluations aligned with NIST SP 800-53, FedRAMP, SOC 2, and ISO 27001, synthesizing findings into risk summaries and remediation recommendations for stakeholder review.

- Maintain assessment findings, control evidence, and remediation status in ServiceNow to support audit readiness, governance oversight, and timely stakeholder follow-up.
- Mentor and train new and junior analysts on processes, procedures, and workflows, supporting readiness activities and knowledge transfer consistent with governance operating discipline.
- Assess access policies to validate least-privilege and RBAC requirements, recommending control improvements that strengthen governed access and accountability.

Security Operations Center Analyst (Remote Contract)

Oct 2022 – Apr 2023

Daggers Group of Companies

Remote

- Built dashboards and executive-level metrics for incidents and continuous monitoring, improving leadership visibility into risk trends and remediation priorities.
- Developed incident-response playbooks, operating procedures, and governance documentation in partnership with IT, engineering, and business stakeholders, improving process consistency and follow-through.
- Maintained investigation findings, corrective actions, and supporting records, providing transparent, auditable documentation for risk reviews and leadership reporting.

Operations Analyst

Nov 2018 – Dec 2022

FedEx Ground

Mahtomedi, MN

- Led a quarterly cost-reduction project analyzing departmental spend and procurement data, identifying unused/excess materials and delivering a 30% reduction in associated costs.
- Built and maintained Google Sheets reporting used to present high-level operational and financial information to stakeholders for review and approval.
- Presented operational, performance, and budget metrics to senior management on a recurring basis to guide compliance and risk-management decisions.
- Built Splunk dashboards and Python integrations to automate reporting and provide stakeholders with more timely operational insights.

Operations Analyst

Aug 2016 – Nov 2018

Data-Aim

Brooklyn Park, MN

- Partnered with business and technical stakeholders to define KPIs, document requirements, and recommend data-driven process improvements.
- Built SQL and Docker-based ETL workflows to collect, clean, and validate data, improving reporting reliability and traceability.
- Automated recurring reports with SQL, Python, Excel, and Power BI, shortening reporting cycles and enabling faster governance and operational decision-making.

EDUCATION

Master of Science in Aviation Cybersecurity — Embry-Riddle Aeronautical University (2026)

Master of Science in Cybersecurity Engineering — Colorado Technical University (2023)

Technical Certificate in Data Analysis — University of Minnesota (2020)

Bachelor of Science in Economics — University of Liberia (2011)

CERTIFICATIONS

AI Security and Governance • CompTIA Security+ • ISC2 Certified in Cybersecurity (CC) • Certified ScrumMaster • Certified Incident Responder (INE) – In Progress • AWS Certified Cloud Practitioner – In Progress
